NOTES

1 US \$ Original Estimate figures are WT's estimates based on US labor rates applied to the total # of Hrs. required as well as equipment and material which is to be purchased in the US.

38,175,000

13,625,000

51,800,000

20,998,718

(1,218,718)

19,780,000

2 US \$ Column shows all equipment, material & services which will be purchased out of the US.

Khaled (Profit to be Split with EPS)

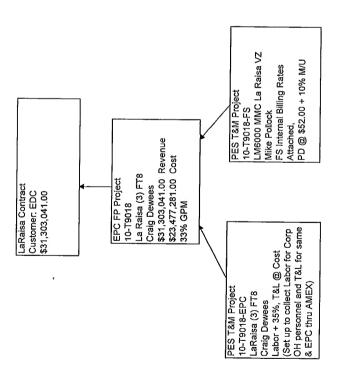

Sales Price EPS to CORPOELEC

Total Cost to EPS

Profit

- 3 Bs Column shows all labor and services which will be purshased locally. These are based on quotes we have gotten recently from local contractors so they differ somewhat from the Original Estimate.
- The high percentage for Local Labor Contingency is based on our concern about the affect that the Local Labor Unions might have on this fast track project. This could add substantially to current labor quotes.
- 5 The Social Welfare Tax amount has replaced the \$1.3 MM comission that was in the original budget.
